Objective

Full stack developer with 5+ years' experience eager to leverage strong React, Node.js, and MongoDB skills to build scalable, user-centric web applications that drive business growth.

Summary

- Proven full stack developer skilled in designing and deploying robust web apps with React, Node.js, Express, and MongoDB. Expert in backend API development, JWT authentication, and optimizing app performance by 20%+. Adept at leading projects, automating workflows, and mentoring teams to deliver seamless digital solutions. Passionate about creating efficient code and enhancing user experiences from concept through launch.

Experience

- **Microgold Computer Technologies**   2022 - 2022
  Coding Instructor
    - Mentored 15+ junior developers, aiding their professional transitions through hands-on PHP/JavaScript training.
    - Created an e-commerce platform (BillyStore.dev) as a practical teaching tool, demonstrating real-world web architecture

- **Fireswitch Technologies**   May 2022 - Jan 2024
  Backend Developer - Nodejs
    - Engineered backend system for Fulazo.io, a crowdfunding platform, boosting investor engagement.
    - Reduced response load time by 20% on ReniTrust by optimizing backend code, improving user experience.
    - Scaled escrow-based e-commerce backend (ReniStore) to handle 100+ daily transactions reliably.
    - Built core backend APIs for CampusPal, enabling anonymous student reporting to university authorities.
    - Developed full backend infrastructure for Greenpower's solar product installment platform, enhancing sales flow.

- **Codetrix web developers**   Jan 2023 - Aug 2024
  LLM code reviewer
    - Reviewed Python and JavaScript code generated by Large Language Models (LLMs) for accuracy, efficiency, and security.
    - Provided actionable feedback to improve AI model outputs and mentored junior reviewers.
    - Collaborated with ML engineers to design better prompt strategies and test cases for code evaluation.
    - Logged bug reports and documentation to refine model training datasets.

Education

- **Obafemi Awolowo university, Ile ife**   2022 -
  Civil engineering

- **W3Schools.com**   Aug 2020 - Oct 2022
  Frontend web development

- **MongoDB university**   Nov 2022 - Jan 2023
  MongoDB certified course

- **JSMastery pro courses** Mar 2021 - Jul 2021
  JsMastery react course

Skills

- React
- Expressjs
- Nodejs
- Nextjs
- JWT authentication
- MongoDB
- HTML/CSS
- JavaScript
- WordPress
- CI/CD pipelines
- Problem Solving
- Team Leadership
- Effective Communication

Projects

- **Central Market**
  - Developed JWT-based user authentication and session management, enhancing security for 500+ users.
  - Designed inventory and cart management systems, improving vendor product tracking and increasing order consistency across devices by 25%.
  - Technologies: Node.js, Express, EJS, JWT authentication, express sessions.

- **BiographyHub**
  - Automated content creation and posting twice daily using cron scheduler and Google Gemini 2.5 AI, increasing site activity.
  - Integrated Twitter API to share post summaries, boosting social media engagement by 30%.

- **Short-en**
  - Developed a link shortener with real-time click analytics, tracking user engagement and enabling data-driven link management.
  - Achieved accurate tracking of link clicks with scalable backend support for growing user activity.

Interests

- Reading
- Football
- Movies
