
Saad Ademola Idris

2, OAGF Quarters, Kubwa Abuja

[+234\(0\) 09076147178](tel:+23409076147178) | saadidris23@gmail.com

Objective

Experienced Full Stack developer with 5+ years of proven expertise in React, Node.js, Express, and MongoDB. Adept at building scalable, secure, and user-centric web applications and APIs that drive business growth. Skilled in **TypeScript**, **RESTful API** design, react **animations** and **cloud** deployments, seeking to contribute to innovative frontend and backend projects and deliver useful solutions.

Skills

Technical Skills:

- **backend Development:** Node.js, Express.js, TypeScript (proficient)
- **Frontend Development:** React, **GSAP** Automation, TailwindCSS, Redux
- **API Design:** RESTful APIs, JWT Authentication, Session Management
- **Database Management:** MongoDB (schema design, indexing, aggregation), PostgreSQL
- **Payment Integration:** Pystack, webhook handling
- **Cloud Platforms:** Render (deployment and CI/CD pipelines), Vercel
- **Version Control:** Git
- **Other:** EJS, cron scheduling, Twitter API integration, AI-assisted automation

Soft Skills:

- Problem Solving & Critical Thinking
 - Effective Communication & Team Collaboration
 - Attention to Detail & Adaptability
 - Time Management
-

Professional Experience

OMobile World — Backend developer (Aug 2025 - Oct 2025)

- Developed IP-hive platform for patent filing and investment showcasing, increasing user coverage by over 50%.
- Designed API, managed databases, and integrated payment gateways to improve processing efficiency for government intellectual property offices.
- Collaborated with cross-functional teams to ensure platform scalability and smooth deployment.

Codetrix Technologies — LLM Code Reviewer (Nov 2022 - Mar 2023)

- Reviewed JavaScript code generated by large language models for accuracy, efficiency, and security.
- Provided actionable feedback improving AI code outputs, enhancing prompt engineering and test case design.
- Mentored junior reviewers and documented issues to refine training datasets.

Model Foundation — Coding Instructor (Nov 2022 - Jan 2022)

- Mentored over 15 junior developers on JavaScript and Node.js best practices.
- Created an e-commerce platform (Central Market) for hands-on teaching of modern web architecture.

Projects

Logisticore (delivery platform)

- Developed an API for e-commerce delivery options, letting customers choose carriers and cutting decision time by 40%
- Designed **front-end** for senders, showing quotes from 5+ companies to simplify booking and lift satisfaction by 30%
- Integrated secure **backend** with SMS notifications to senders/receivers for a real-time delivery status updates ensuring <1% error rate
- Optimized cross platform system, enhancing small logistics efficiency 25%

Fischerbon LMS (Learning Management System for Paid AutoCAD Courses)

- Designed and developed robust API for a paid online LMS platform with authentication, course management, and user enrollment features.
 - Integrated Paystack payment gateway with secure transaction initialization, verification, and webhook handling automating enrollment.
 - Designed optimized MongoDB schema and indexes for efficient data queries and duplicate enrollment prevention.
 - Deployed and maintained backend services on Render with CI/CD support.
-

Education

Obafemi Awolowo University, Ile-Ife
Bachelor of Science in Civil Engineering

Certifications & Courses

- JSMastery Pro: TypeScript, Node.js & Express, Frontend Development
- MongoDB University: MongoDB schema design and aggregation
